

COORG INSTITUTE OF DENTAL SCIENCES

Kanjithanda Kushalappa Campus, Maggula
Virajpet - 571 218, Coorg District, Karnataka
Recognised by Dental Council of India, New Delhi
Affiliated to Rajiv Gandhi University of Health Sciences, Bangalore.

The Coorg Institute of Dental Sciences has defined the following Graduate Attributes

The committee has defined the following Graduate Attributes which will guide the assessment process of the institution for the period 2018 – 2025.

1. Knowledge:

The students must demonstrate current and evolving epidemiological, pathogenetic, clinical, biomedical, and therapeutic knowledge as well as application of this knowledge in patient care

2. Communication:

The students must demonstrate acceptable /evolving levels of interpersonal communication skills both verbal and written leading to effective exchange of information with patients, peers, and healthcare professionals

3. Procedural skills

The students must demonstrate the selection and safe conduct of appropriate diagnostic and treatment procedures in a compassionate manner ensuring delivery of quality healthcare and promotion of patient health.

4. Professionalism, ethical and social values.

The students must demonstrate a commitment to ethical behavior with patients and display a strong firm social responsibility and maintain high professional standards.

5. Critical thinking, practice-based learning, and improvement

Kanjithanda Kushalappa Campus, Maggula
Virajpet - 571 218, Coorg District, Karnataka
Recognised by Dental Council of India, New Delhi
Affiliated to Rajiv Gandhi University of Health Sciences, Bangalore.

The students must demonstrate abilities to continuously assimilate and analyze available knowledge and scientific evidence to understand and self-evaluate in a real-time context to improve and provide enhanced patient care.

From the Revised BDS regulations 2007

The Generic Course Outcomes as defined by the Dental Council of India and the Rajiv Gandhi University of Health Sciences is as follows and this is communicated to the students through the website and during the orientation programs.

The outcomes are dealt under three headings namely

- (a) knowledge and understanding
- (b) skills and
- (c) attitudes.

a. Knowledge and understanding

The graduate should acquire the following during the period of training.

1. Adequate knowledge of the scientific foundations on which dentistry is based and good understanding of various relevant scientific methods, principles of biological functions and should be able to evaluate and analyse scientifically various established facts and data.
2. Adequate knowledge of the development, structure and function of the teeth, mouth and jaws and associated tissues both in health and disease and their relationship and effect on general-state of health and also the bearing on physical and social well-being of the patient.

Kanjithanda Kushalappa Campus, Maggula
Virajpet - 571 218, Coorg District, Karnataka
Recognised by Dental Council of India, New Delhi
Affiliated to Rajiv Gandhi University of Health Sciences, Bangalore.

3. Adequate knowledge of clinical disciplines and methods, which provide a coherent picture of anomalies, lesions and diseases of the teeth, mouth and jaws and preventive, diagnostic and therapeutic aspects of dentistry.
4. Adequate clinical experience required for general dental practice.
5. Adequate knowledge of biological function and behaviour of persons in health and sickness as well as the influence of the natural and social environment on the state of health so far as it affects dentistry.

b. Skills

A graduate should be able to demonstrate the following skills necessary for practice of dentistry.

1. Able to diagnose and manage various common dental problems encountered in general dental practice, keeping in mind the expectations and the right of the society to receive the best possible treatment available wherever possible.
2. Acquire skill to prevent and manage complications if encountered while carrying out various dental surgical and other procedures.
3. Possess skill to carry out required investigative procedures and ability to interpret laboratory findings.
4. Promote oral health and help to prevent oral diseases wherever possible.
5. Competent in control of pain and anxiety during dental treatment.

c. Attitudes

A graduate should develop during the training period the following attitudes.

1. Willing to apply current knowledge of dentistry in the best interest of the patients and the community.
2. Maintain a high standard of professional ethics and conduct and apply these in all aspects of professional life.

From MDS Regulations 2017

The Generic Learning Outcomes of the MDS Course are as follows

Goals:

The goals of postgraduate training in various specialties is to train B.D.S. graduate who will, after successful completion of the course:

1. Practice respective specialty efficiently and effectively, backed by scientific knowledge and skill.
2. Exercise empathy and a caring attitude and maintain high ethical standards.
3. Continue to evince keen interest in continuing professional education in the specialty and allied
4. specialties irrespective of whether in teaching or practice.
5. Willing to share the knowledge and skills with any learner, junior or a colleague.
6. Develop the faculty for critical analysis and evaluation of various concepts and views, to adopt the most rational approach.

Objectives:

The objective is to train a candidate so as to ensure higher competence in both general and special area of interest and prepare him for a career in teaching, research and specialty practice. A candidate must achieve a high degree of clinical proficiency in the subject matter and develop competence in research and its methodology as related to the field concerned.

The above objectives are to be achieved by the time the candidate completes the course. The objectives may be considered as under -

1. Knowledge (Cognitive domain)
2. Skills (Psycho motor domain)
3. Human values, ethical practice and communication abilities

Knowledge:

1. Demonstrate understanding of basic sciences relevant to specialty.

Kanjithanda Kushalappa Campus, Maggula
Virajpet - 571 218, Coorg District, Karnataka
Recognised by Dental Council of India, New Delhi
Affiliated to Rajiv Gandhi University of Health Sciences, Bangalore.

2. Describe etiology, pathophysiology, principles of diagnosis and management of common problems within the specialty in adults and children.
3. Identify social, economic, environmental and emotional determinants in a given case and take them into account for planning treatment.
4. Recognize conditions that may be outside the area of specialty/competence and to refer them to an appropriate specialist.
5. Update knowledge by self-study and by attending courses, conferences, seminars relevant to specialty.
6. Undertake audit, use information technology and carry out research with the aim of publishing or presenting the work at various scientific gatherings.

Skills:

1. Take a proper clinical history, examine the patient, perform essential diagnostic procedures and order relevant tests and interpret them to come to a reasonable diagnosis about the condition.
2. Acquire adequate skills and competence in performing various procedure required in the specialty.

Human values, ethical practice and communication abilities:

1. Adopt ethical principles in all aspects of practice.
2. Professional honesty and integrity are to be fostered.
3. Patient care is to be delivered irrespective of social status, caste, creed or religion of the patient.
4. Develop communication skills, in particular and skill to explain various options available in management and to obtain a true informed consent from the patient
5. Provide leadership and get the best out of his team in a congenial working atmosphere.
6. Apply high moral and ethical standards while carrying out human or animal research.
7. Be humble and accept the limitations in his knowledge and skill and to ask for help from colleagues when needed.

Affiliated to Rajiv Gandhi University of Health Sciences, Bangalore.

8. Respect patient's rights and privileges including patient's right to information and right to seek a second opinion.

The Program Specific Learning Outcomes defined by the Institution are as follows

Prosthodontics

To train dental graduates so as to ensure higher competence in both general and special area of Prosthodontics and prepare a candidate for teaching, research and clinical abilities including prevention and after care in prosthodontics including crown and bridge-and implantology.

General Objectives of the Course:

1. Training programme in Prosthodontic dentistry including Crown & Bridge & Implantology is structured to achieve knowledge and skill in theoretical and clinical laboratory, attitude, communicative skills and ability to research with understanding of social, cultural, education and environmental background of the society
2. To have acquired adequate knowledge and understanding of applied basic and systematic medical science knowledge in general and particular to head and neck.
3. The postgraduates will be able to provide Prosthodontic therapy for patients with competence and working knowledge with understanding of applied medical, behavioral and clinical science that are beyond the treatment skills of the general BDS graduate and MDS graduate of other specialties to demonstrate evaluative and judgment skills in making appropriate decisions regarding prevention, treatment aftercare and referral to deliver comprehensive care to patients.

Knowledge

The candidate should possess knowledge applied basic and systematic medical sciences.

1. On human anatomy, embryology, histology, applied in general and particular to head and neck, Physiology & Biochemistry, Pathology and microbiology, virology, Health and diseases of various systems of the body (systemic) principles in surgery

- and medicine, Pharmacology, Nutrition, behavioral Science, Age changes, genetics, Immunology, Congenital defects and syndrome and Anthropology, Bioengineering, Bio-medical and Biological Principle and application Dental material science
2. Ability to diagnose and plan treatment for patients requiring a Prosthodontic therapy
 3. Ability to read and interpret a radiograph and other investigations for the purpose of diagnosis treatment planning.
 4. Tooth and tooth surface restorations, Complete denture prosthodontics, removable partial dentures Prosthodontics, fixed prosthodontics and maxillofacial and Craniofacial Prosthodontics, implants supported Prosthodontics, T.M.J, and occlusion, craniofacial esthetic, and biomaterials. Craniofacial disorders, problems of psychogenic origin.
 5. Age changes and Prosthodontic Therapy for aged.
 6. Ability to diagnose failed restoration and provide Prosthodontic therapy and after care.
 7. Should have essential knowledge on ethics, laws and Jurisprudence and forensic odontology in Prosthodontics
 8. General health conditions and emergency as related to prosthodontics treatment,
 9. Identify social, cultural, economic, environmental, educational and emotional determinants of the patient and consider them in planning the treatment.
 10. Identify cases, which are outside the area of his specialty/ competence and refer them to appropriate specialists.
 11. Advice regarding case management involving surgical, interim treatment etc.
 12. Competent specialization in team management of craniofacial design.
 13. Should attend continuing education programmes, seminars and conferences related to prosthodontics in thus updating himself/herself.
 14. Teach and guide his / her team, colleague and other students.
 15. Should be able to use information technology tools and carry out research basic and clinical, with the aims of publishing his/ her work and presenting his/her work at various scientific forums.

16. Should have essential knowledge of personal hygiene, infection control, prevent of cross infection and safe disposal of waste, keeping in view the risks of transfer of Hepatitis & HIV
17. Should have an ability to plan to establish Prosthodontic clinic/department in a teaching hospital
18. Should have a sound knowledge for the application of pharmacology, effects of drugs on oral tissues and systems of the body and on medically compromised individuals.

Skills

1. The candidate should be able to examine the patients requiring Prosthodontic therapy, investigate the patient systemically, analyze the investigation results, radiography, diagnose the ailment, plan a treatment, communicate it with the patient and execute it.
2. Understand the prevalence and prevention of diseases of craniomandibular system related to Prosthetic dentistry.
3. The candidate should be able to restore the lost functions of the stomatognathic system namely speech, mastication etc to provide a quality health care for craniofacial region
4. The candidate should be able to interact with other speciality including a medical speciality for a planned team management of patients for a craniofacial and oral acquired and congenital defects, Temporomandibular joint syndromes, esthetics, Implant supported Prosthetics and problems of Psychogenic origin,
5. Should be able to demonstrate the clinical competence necessary to carry out appropriate treatment at higher level of knowledge, training and practice skills currently available in their specialty area.
6. Identify target diseases and awareness amongst the population for Prosthodontic therapy.
7. Perform clinical and Laboratory procedure with understanding of biomaterials, tissue conditions related to prosthesis and have competent dexterity and skill for

PERIODONTOLOGY

Objectives

The following objectives are laid out to achieve the goals of the course

Knowledge

1. Discuss historical perspective to advancement in the subject proper and related topics
2. Describe etiology, pathogenesis, diagnosis and management of common periodontal diseases with emphasis on Indian population
3. Familiarize with the biochemical, microbiologic and immunologic genetic aspects of periodontal pathology
4. Describe various preventive periodontal measures
5. Describe various treatment modalities of periodontal disease from historical aspect to currently available ones
6. Describe interrelationship between periodontal disease and various systemic conditions
7. Describe periodontal hazards due to iatrogenic causes and deleterious habits and prevention of it
8. Identify rarities in periodontal disease and environmental/ Emotional determinates in a given case
9. Recognize conditions that may be outside the area of his Speciality/competence and refer them to an appropriate Specialist
10. Decide regarding non-surgical or surgical management of the case
11. Update him by attending course, conferences and seminars relevant to periodontics or by self learning process.
12. Plan out/ carry out research activity both basic and clinical aspects with the aim of publishing his/her work in scientific journals
13. Reach to the public to motivate and educate regarding periodontal disease, its prevention and consequences if not treated

14. Plan out epidemiological survey to assess prevalence and incidence of early onset periodontitis and adult periodontitis in Indian population (Region wise)
15. Shall develop knowledge, skill in the science and practice of Oral Implantology
16. Shall develop teaching skill in the field of Periodontology and Oral Implantology

SKILL

1. take a proper clinical history, thorough examination intra orally, extra orally, medical history evaluation, advice essential diagnostic procedures and interpret them to come to a reasonable diagnosis
2. Effective motivation and education regarding periodontal disease and maintenance after the treatment
3. Perform both non-surgical & education regarding periodontal disease, maintenance after the treatment
4. Perform both non-surgical and surgical procedures independently
5. Provide Basic Life Support Service (BLS)

Human values, ethical practice & communication abilities

1. Adopt ethical principles in all aspects of treatment modalities, Professional honesty & integrity are to be fostered. Develop Communication skills to make awareness regarding periodontal disease
2. Apply high moral and ethical standards while carrying out human or animal research, Be humble,
3. accept the limitations in his/her knowledge and skill, and ask for help from colleagues when needed,
4. Respect patients rights and privileges, including patients right to information and right to seek a second opinion.

ORAL AND MAXILLOFACIAL SURGERY

Objective :

The training program in Oral and Maxillofacial Surgery is structured to achieve the following four objectives-

1. Knowledge
2. Skills
3. Attitude
4. Communicative skills and ability

Knowledge:

1. To have acquired adequate knowledge and understanding of the etiology, pathophysiology and diagnosis, treatment planning of various common oral and Maxillofacial surgical problems both minor and major in nature.
2. To have understood the general surgical principles like pre and post surgical management, particularly evaluation, post surgical care, fluid and electrolyte management, blood transfusion and post surgical pain management.
3. Understanding of basic sciences relevant to practice or oral and maxillofacial surgery.
4. Able to identify social, cultural, economic, genetic and environmental factors and their relevance to disease process management in the oral and Maxillofacial region.
5. Essential knowledge of personal hygiene and infection control, prevention of cross infection and safe disposal of hospital waste keeping in view the high prevalence of hepatitis and HIV.

Skill

1. To obtain proper clinical history, methodical examination of the patient, perform essential diagnostic procedures and order relevant laboratory tests and interpret them and to arrive at a reasonable diagnosis about the surgical condition.

PRINCIPAL

Kanjithanda Kushalappa Campus, Maggula
Virajpet - 571 218, Coorg District, Karnataka
Recognised by Dental Council of India, New Delhi
Affiliated to Rajiv Gandhi University of Health Sciences, Bangalore.

2. To perform with competence minor oral surgical procedures and common maxillofacial surgery. To treat both surgically and medically (or by other means of the oral and Maxillofacial and the related area).
3. Capable of providing care for maxillofacial surgery patients.

Attitude:

1. Develop attitude to adopt ethical principles in all aspect of surgical practice, professional honesty and integrity are to be fostered. Surgical care is to be delivered irrespective of the social status, caste, creed or religion of the patient.
2. Willing to share the knowledge and clinical experience with professional colleagues.
3. Willing to adopt new techniques of surgical management developed from time to time based on scientific research which are in the best interest of the patient
4. Respect patient's right and privileges, including patients right to information and right to seek a second opinion.
5. Develop attitude to seek opinion from an allied medical and dental specialists as and when required.

Communication skills:

1. Develop adequate communication skills particularly with the patients giving them the various options available to manage a particular surgical problem and obtain a true informed consent from them for the most appropriate treatment available at that point of time
2. Develop the ability to communicate with professional colleagues.
3. Develop ability to teach undergraduates.

CONSERVATIVE DENTISTRY and ENDODONTICS

Affiliated to Rajiv Gandhi University of Health Sciences, Bangalore.

The following objectives are laid out to achieve the goals of the course. These are to be achieved by the time the candidate completes the course. These objectives may be considered under the following subtitles.

Knowledge

At the end of 36 months of training, the candidates should be able to:

1. Describe aetiology, pathophysiology, periapical diagnosis and management of common restorative situations, endodontic situations that will include contemporary management of dental caries, management of trauma and pulpal pathoses including periodontal situations.
2. Demonstrate understanding of basic sciences as relevant to conservative / restorative dentistry and Endodontics.
3. Identify social, economic, environmental and emotional determinants in a given case or community and take them into account for planning and execution at individual and community level.
4. Ability to master differential diagnosis and recognize conditions that may require multi disciplinary approach or a clinical situation outside the realm of the specialty, which he or she should be able to recognize and refer to appropriate specialist.
5. Update himself by self-study and by attending basic and advanced courses, conferences, seminars, and workshops in the specialty of Conservative Dentistry-Endodontics-Dental Materials and Restorative Dentistry.
6. Ability to teach, guide, colleagues and other students. Use information technology tools and carry out research both basic and clinical with the aim of publishing his/her work and presenting the same at scientific platforms

Skills

1. Take proper chair side history, examine the patient and perform medical and dental diagnostic procedures and order as well as perform relevant tests and interpret to them to come to a reasonable diagnosis about the dental condition in general and Conservative Dentistry - Endodontics in particular. And undertake

ORTHODONTICS & DENTOFACIAL ORTHOPAEDICS

The training programme in Orthodontics is to structure and achieve the following four objectives

Knowledge of

1. The dynamic interaction of biologic processes and mechanical forces acting on the stomatognathic system during orthodontic treatment
2. The etiology, pathophysiology, diagnosis and treatment planning of various common Orthodontic problems
3. Various treatment modalities in Orthodontics preventive interceptive and corrective.
4. Basic sciences relevant to the practice of Orthodontics
5. Interaction of social, cultural, economic, genetic and environmental factors and their relevance to management of oro - facial deformities
6. Factors affecting the long-range stability of orthodontic correction and their management
7. Personal hygiene and infection control, prevention of cross infection and safe disposal of hospital waste, keeping in view the high prevalence of Hepatitis and HIV and other highly contagious diseases.

Skills

1. To obtain proper clinical history, methodical examination of the patient, perform essential diagnostic procedures, and interpret them and arrive at a reasonable diagnosis about the Dentofacial deformities.
2. To be competent to fabricate and manage the most appropriate appliance - intra or extra oral, removable or fixed, mechanical or functional, and active or passive - for the treatment of any orthodontic problem to be treated singly or as a part of multidisciplinary treatment of orofacial deformities.

ORAL AND MAXILLOFACIAL PATHOLOGY; AND ORAL MICROBIOLOGY

Objectives

1. To train a post graduate dental surgeon so as to ensure higher competence in both general and special pathology dealing with the nature of oral diseases, their causes, processes and effects.
2. An oral pathologist is expected to perform routine histopathological evaluation of specimens relating to oral and perioral tissues, to carry out routine diagnostic procedures including hematological, cytological, microbiological, Immunological and ultrastructural investigations.
3. He/she is expected to have an understanding of current research methodology, collection and interpretation of data, ability to carry out research projects on clinical and/or epidemiological aspects, a working knowledge on current databases, automated data retrieval systems, referencing and skill in writing scientific papers.
4. He/she is expected to present scientific data pertaining to the field, in conferences both as poster and verbal presentations and to take part in group discussions.

PUBLIC HEALTH DENTISTRY

Objectives

At the end of 3 years of training the candidate should be able to:

Knowledge

1. apply basic sciences knowledge regarding etiology, diagnosis and management of the prevention, promotion and treatment of all the oral conditions at the individual and community level.
2. Identify social, economic, environmental and emotional determinants in a given individual patient or a community for the purpose of planning and execution of Community Oral Health Program.

3. Ability to conduct Oral Health Surveys in order to identify all the oral health problems affecting the community and find solutions using multi - disciplinary approach. c Ability to act as a consultant in community Oral Health, teach, guide and take part in research (both basic and clinical), present and publish the outcome at various scientific conferences and journals, both national and international level.

Skills

The candidate should be able to

1. Take history, conduct clinical examination including all diagnostic procedures to arrive at diagnosis at the individual level and conduct survey of the community at state and national level of all conditions related to oral health to arrive at community diagnosis. Plan and perform all necessary treatment, prevention and promotion of Oral Heal at the individual and community level.
2. Plan appropriate Community Oral Health Program, conduct the program and evaluate, at the community level.
3. Ability to make use of knowledge of epidemiology to identify causes and appropriate preventive and control measures.
4. Develop appropriate person power at various levels and their effective utilization.
5. Conduct survey and use appropriate methods to impart Oral Health Education.
6. Develop ways of helping the community towards easy payment plan, and followed by evaluation for their oral health care needs.
7. Develop the planning, implementation, evaluation and administrative skills to carry out successful community Oral Health Programs.

Values:

1. Adopt ethical principles in all aspects of Community Oral Health Activities.
2. To apply ethical and moral standards while carrying out epidemiological researches.
